ABOUT MASTERPATH

YOUR PATHWAY TO INDUSTRY-READY TECH CAREERS

MasterPath is a premier technology training institute dedicated to transforming aspiring professionals into industry-ready developers. We bridge the gap between academic knowledge and real-world skills through practical, hands-on learning experiences.

Our programs are designed with direct input from industry leaders, ensuring every student gains the exact skills employers demand. With expert mentors, real-world projects, and dedicated career support, MasterPath delivers a complete pathway from learning to placement.

Our Mission

To empower individuals with practical, industry-aligned technology skills and provide a clear pathway to successful tech careers through hands-on training, real-world projects, and dedicated placement support.

What Makes Us Different

- Industry-aligned curriculum designed with employer input
- Real-world project experience from day one
- Expert mentors with active industry experience
- Dedicated career guidance and placement support
- Internship opportunities with partner companies

WHAT IS FULL STACK DEVELOPMENT?

Full Stack Development means building complete web applications from start to finish. A full stack developer works across the entire stack — from the user interface to the server, the database, and finally

**One Developer.
Every Layer. Full Lifecycle.**

1

FRONTEND

Builds the user interface and user experience that users interact with.

2

BACKEND

Handles server logic, application processing, and business rules.

3

DATABASE

Stores, manages, and retains data securely and efficiently.

4

DEPLOYMENT

Deploys the application to the cloud or server for real-world use.

Full Stack Developers build, connect, and deliver — the entire application, end to end.

FULL STACK DEVELOPMENT CURRICULUM

01 HTML5 & CSS3

Build semantic, responsive and accessible web pages.

06 Node.js

Run JavaScript on the server with Node.js.

11 Git & GitHub

Version control and collaborate like a professional.

02 Bootstrap

Create modern, mobile-first layouts quickly.

07 Express.js

Build robust and scalable backend applications.

12 OOPS

Write clean, modular and reusable object-oriented code.

03 JavaScript

Add interactivity and dynamic behavior to web apps.

08 MongoDB

Work with NoSQL database for flexible data storage.

13 DSA

Strengthen problem-solving with data structures & algorithms.

04 React.js

Build fast, scalable and component-based UIs.

09 MySQL

Design and manage relational databases efficiently.

14 Security

Implement best practices to secure your applications.

05 Redux

Manage application state predictably and efficiently.

10 REST APIs

Design and consume secure, scalable RESTful APIs.

15 Deployment

Deploy applications reliably to production.

FRONTEND DEVELOPMENT

Build responsive, interactive, and high-performance web applications with modern frontend technologies. Our curriculum empowers you to create beautiful user experiences and scalable interfaces used across industries.

HTML5 & CSS3

Bootstrap

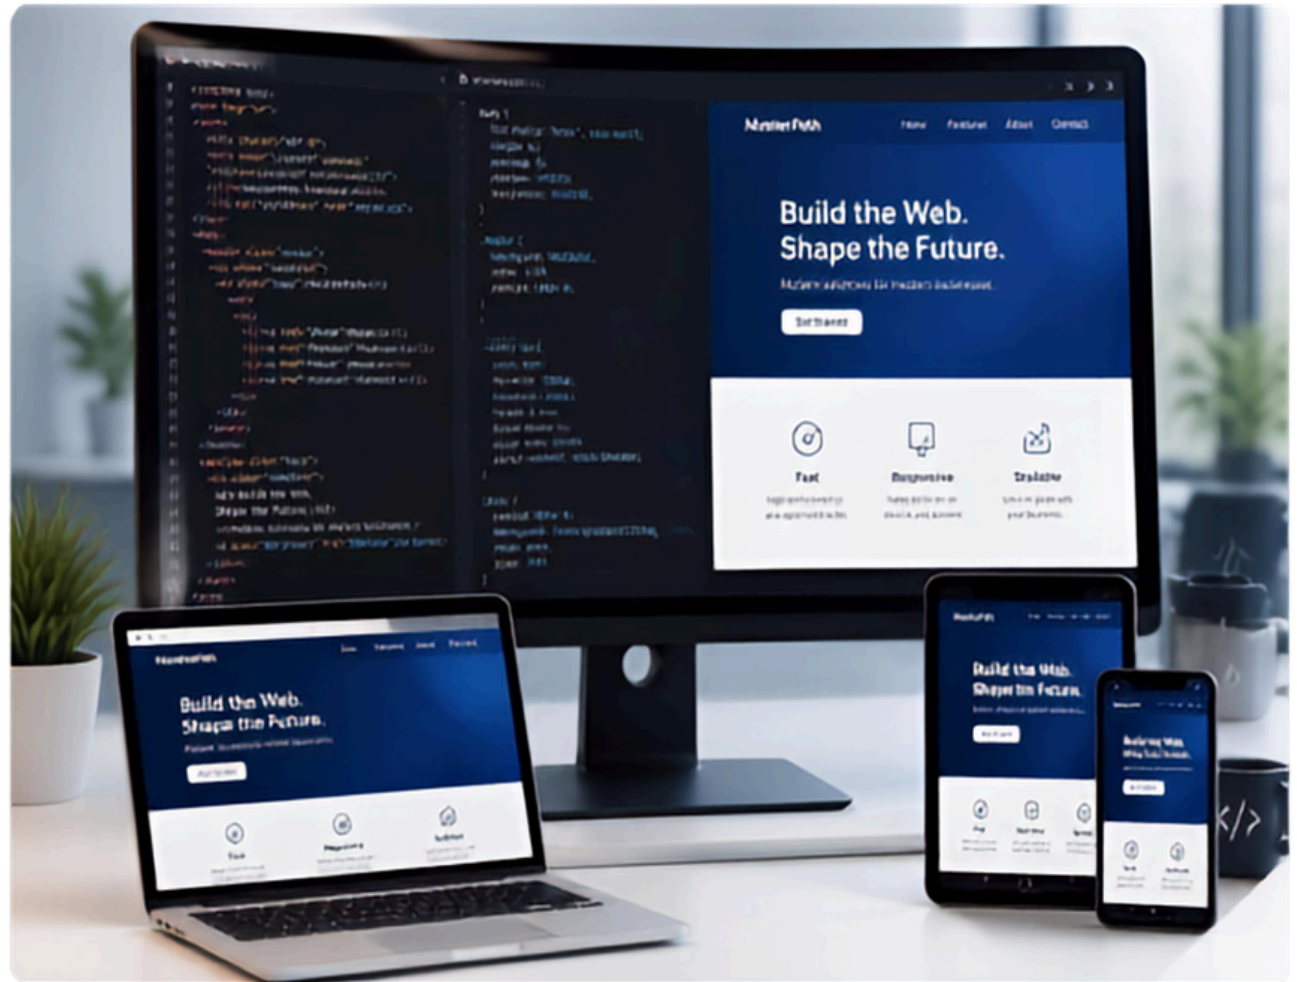

JavaScript

React.js

Redux

Modern Tech Stack

Responsive Design

Career Ready

CREATE. INNOVATE. ELEVATE.

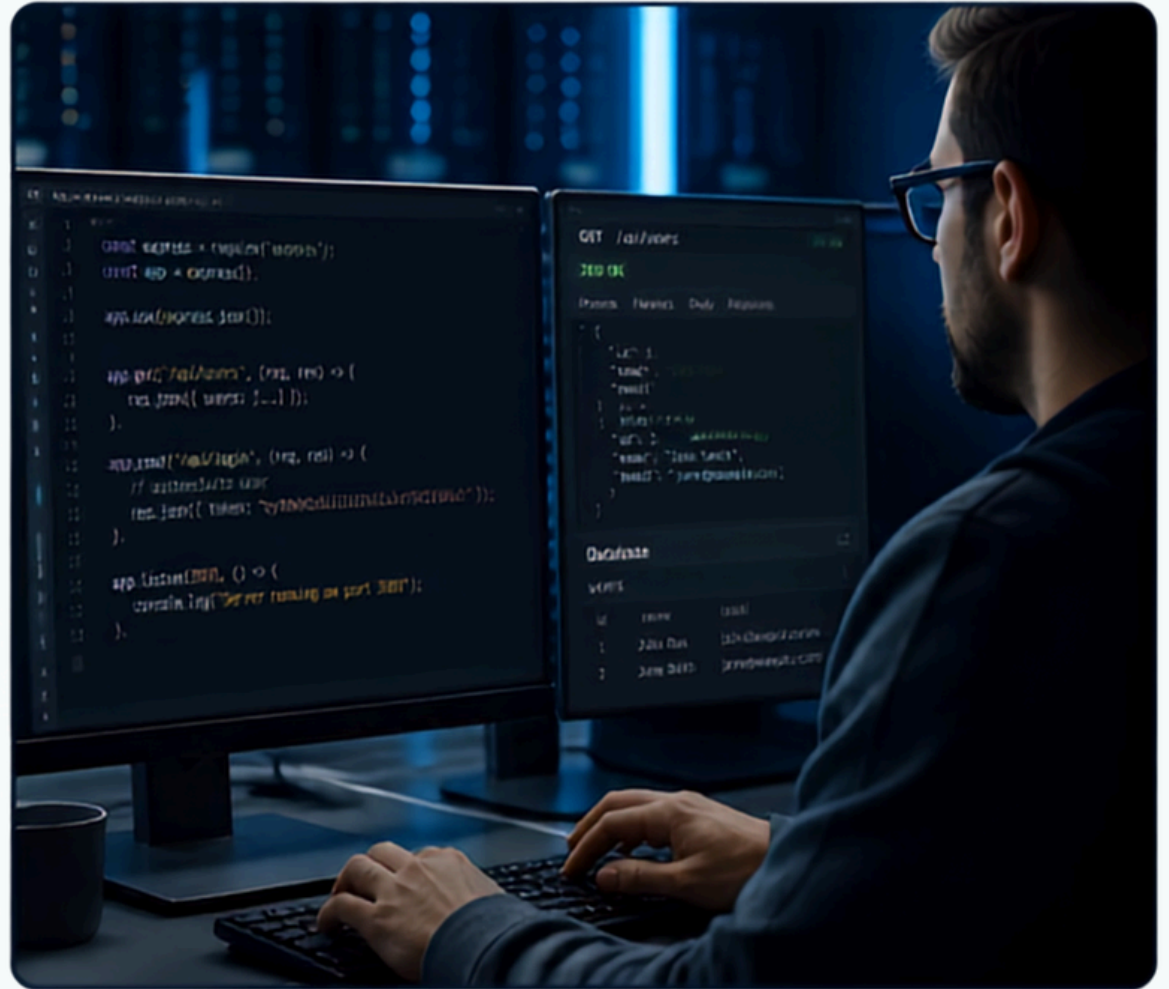

MASTER THE FRONTEND. BUILD THE FUTURE.

BACKEND DEVELOPMENT

Build robust, scalable, and secure server-side applications using industry-standard technologies and best practices. Learn to design APIs, manage databases, handle requests, and implement authentication for modern web solutions.

TOPICS COVERED

- ✓ Node.js
- ✓ Express.js
- ✓ REST APIs
- ✓ HTTP Server
- ✓ Routing
- ✓ Middleware
- ✓ MVC
- ✓ Authentication

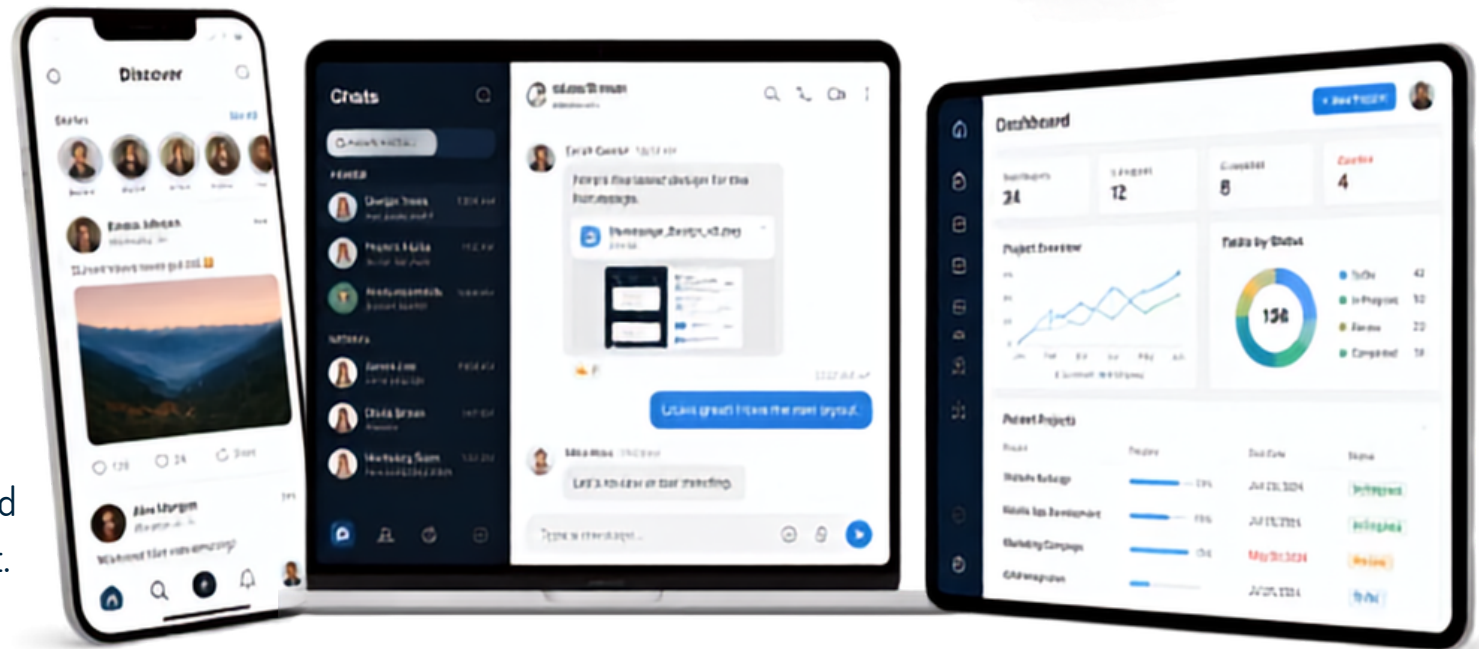

Master the server side.
Power the entire application.

Strong backend. Seamless performance.
Built for the future.

ADVANCED PROJECTS

High-performance, feature-rich applications designed to solve real-world challenges and drive meaningful impact.

SOCIAL MEDIA APP

Connect, share, and engage with communities in real time.

- ✓ User Profiles & Timeline
- ✓ Posts, Reactions & Comments
- ✓ Real-time Notifications
- ✓ Media Sharing & Stories

REAL-TIME CHAT APP

Seamless communication with speed, security, and reliability.

- ✓ One-to-One & Group Chats
- ✓ Real-time Messaging
- ✓ File & Media Sharing
- ✓ Read Receipts & Typing Indicators

PROJECT MANAGEMENT TOOL

Plan, track, and deliver projects with clarity and confidence.

- ✓ Project & Task Management
- ✓ Team Collaboration
- ✓ Progress Tracking & Analytics
- Deadlines & Milestones

SECURITY & DEPLOYMENT

MasterPath follows a secure-by-design approach and modern deployment practices to ensure reliability, scalability, and performance across environments.

DEVELOP

BUILD WITH CONFIDENCE

Engineers build modular, maintainable code with industry best practices and version control.

GitHub

Code repository & collaboration

TEST

TEST FOR RELIABILITY

APIs and endpoints are tested thoroughly to ensure functionality, performance, and reliability.

Postman

API testing & validation

SECURE

SECURE BY DESIGN

Multiple layers of security are implemented to protect data, prevent abuse, and ensure application integrity.

JWT Authentication

Input Validation

CORS

Rate Limiting

DEPLOY

DEPLOY ANYWHERE

Deploy to scalable, production-ready platforms with CI/CD and global infrastructure support.

- Vercel
- Render
- Heroku

BUILT SECURE. TESTED THOROUGHLY. DEPLOYED CONFIDENTLY.

MasterPath ensures your application is not only powerful, but also secure, reliable, and ready for the world.

CAREER & PLACEMENT

At MasterPath, we go beyond training—we prepare you for a successful tech career. Our dedicated career support ensures you're job-ready and confident.

CAREER PREPARATION

Mock Interviews

Realistic mock sessions to build confidence and improve performance.

Resume Building

Create a professional, ATS-friendly resume that gets noticed.

Portfolio Development

Build impressive projects that showcase your skills and potential.

Interview Preparation

Expert guidance on technical rounds and HR interviews.

Freelancing Tips

Learn how to find clients, bid smartly, and grow your freelance career.

CAREER OPPORTUNITIES

**Front-End
Developer**

**Full Stack
Developer**

**Back-End
Developer**

**Web Application
Developer**

We prepare you for opportunities. **You build the future.**

DATABASES

KEY TOPICS

MongoDB

Work with MongoDB for flexible, scalable NoSQL data storage using SQL-like documents.

MySQL

Design and manage relational databases with MySQL for reliable and structured data management.

CRUD

Perform Create, Read, Update, and Delete operations to manage data efficiently.

Collections

Organize data in MongoDB collections for dynamic and high-performance access.

Tables

Define and manage structured data using MySQL tables and relationships.

Joins

Combine data from multiple tables using joins to extract meaningful insights.

Aggregation

Use aggregation pipelines in MongoDB to process and analyze data.

Mongoose

Build schema-based models and interact with MongoDB efficiently using Mongoose.

Stored Procedures

Use stored procedures in MySQL to encapsulate logic and improve performance.

DATABASE ARCHITECTURE

APPLICATION LAYER

Web / Mobile / Enterprise Applications

CRUD OPERATIONS

Create

Read

Update

Delete

MONGODB

MongoDB

Collections
Aggregation
Mongoose

MYSQL

MySQL

Tables
Stored
Procedures

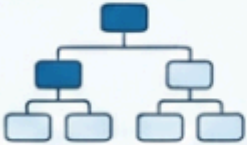

Master structured and unstructured data with industry-leading database technologies.

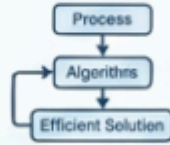

OPS

Object Oriented Programming: classes, objects, inheritance, polymorphism, encapsulation, abstraction.

DSA

Data Structures & Algorithms form the foundation for efficient problem solving and optimal program design.

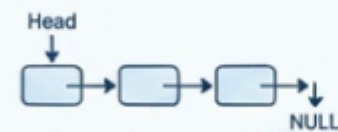

Arrays

Collection of elements stored in continuous memory locations and accessed using an index.

Linked Lists

Linear collection of nodes where each node points to the next node in the sequence.

Stacks

LIFO (Last-in-First-Out) data structure where insertion and deletion occur at the same end (top).

Queues

FIFO (First-In-First-Out) data structure where retention happens at the rear and deletion from the front.

Trees

Hierarchical data structure of nodes connected by edges with a single root node.

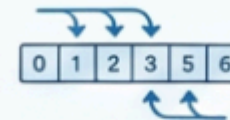

Graphs

Collection of vertices (nodes) connected by edges, representing relationships between entities.

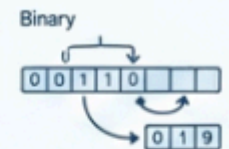

Sorting

Arranging elements in a specific order to enable efficient search and processing.

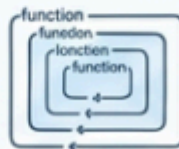

Searching

Finding the position of a target element in a collection efficiently.

Recursion

Solving problems by breaking them into smaller subproblems of the same type.

Dynamic Programming

Solving complex problems by storing results of overlapping subproblems to optimize performance.

Backtracking

Algorithmic technique for finding all possible solutions by trying and undoing choices.

BUILT WITH MODERN TECHNOLOGIES.

Our technology stack is carefully curated to deliver seamless user experiences, robust performance, and future-ready applications.

UI FRAMEWORKS & TECHNOLOGIES

MasterPath leverages a modern, proven technology ecosystem to build scalable, secure, and high-performance digital solutions.
